

Wandrea Moscoso

UI/UX Designer | Front-End Developer

0966 703 8290 | wandrea.moscoso@gmail.com | wandrea-moscoso.vercel.app | Metro Manila, Philippines

PROFESSIONAL SUMMARY

UI/UX Designer and Front-End Developer with 8+ years of experience designing and shipping enterprise web applications, mobile apps, and design systems across maritime, HR, logistics, e-commerce, and accounting domains. Owns the full product cycle: requirements gathering, problem definition, research, wireframes, and interactive prototypes, through to production front-end code. Works directly with executives and business owners to translate business goals into usable interfaces, and uses AI-assisted design tools to accelerate concept exploration and feedback turnaround.

CORE SKILLS

- **UX & Product Design:** Requirements gathering, problem definition, user research, sitemaps, user flows, wireframing, mockups, interactive prototyping, interaction design, usability improvement, accessible and inclusive design for low-digital-literacy users, design systems, responsive web design, mobile app design, isometric design, stakeholder presentation and design walkthroughs, design QA
- **Design Tools:** Figma, Figma Make, Webflow, Photoshop, Illustrator, Miro, Notion
- **AI-Assisted Design:** Claude, Claude Design, ChatGPT, Gemini (concept exploration, design system documentation, rapid prototyping, feedback iteration)
- **Front-End Development:** HTML5, CSS3, SASS/SCSS, JavaScript, jQuery, ASP.NET Razor (.cshtml), Bootstrap 5, Material Design 3, Material UI, ReactJS, AngularJS, GatsbyJS, Vite, Axios
- **Testing & Tooling:** REST API integration, AJAX, Postman, Jest, React Testing Library, Lighthouse audits (accessibility, performance, best practices), Git and branch-based collaborative workflows, Azure DevOps (Repos, Boards, Pipelines), code review, cross-browser and responsive testing
- **Ways of Working:** Agile/Scrum delivery (sprint planning, daily stand-ups, sprint reviews, retrospectives), stakeholder management, mentoring junior designers and developers, design critique and internal design reviews, cross-functional collaboration with backend and QA teams, design-to-development handoff

PROFESSIONAL EXPERIENCE

Magsaysay People Resources Corporation | Metro Manila, Philippines

UI/UX Designer | Front-End Developer | February 2024 – August 2026

- Served as the design lead and front-end developer for eight enterprise products, working directly with the company owner, executives, and business unit heads to gather requirements, define the problem, and align design direction with business objectives.
- Ran discovery for each initiative: clarified requirements, researched the problem space and comparable products, and mapped user flows before committing to visual design.
- Designed wireframes, mockups, and interactive prototypes in Figma, then presented them to client stakeholders for review, incorporating feedback across iterations until sign-off.
- Developed the approved designs into production interfaces using ASP.NET Razor (.cshtml) views, HTML5, CSS, JavaScript, jQuery, and Bootstrap 5, ensuring responsive, cross-browser behavior.
- Wired front-end interfaces to backend REST endpoints via AJAX/jQuery, handling validation, loading and error states, and data-driven UI updates.
- Established reusable component patterns and consistent design conventions across products, reducing design and build time on new modules.
- Delivered work in Agile/Scrum sprints alongside backend and QA teams, tracking sprints in Azure DevOps Boards and managing code through Azure Repos with Git branch-based workflows, pull requests, and peer review.
- Designed for a largely non-technical user base with varying digital literacy, prioritizing plain language, clear affordances, legible typography, generous touch targets, and forgiving error handling to reduce support load and drop-off; audited builds with Lighthouse and resolved flagged accessibility and performance issues before release.
- Mentored interns and junior designers and developers across design and front-end practice, and ran design critiques in internal reviews to raise consistency and quality across the team.

- Integrated AI tools (Figma Make, Claude, Claude Design, ChatGPT, Gemini) into the design workflow to speed up concept exploration, produce design system documentation, and apply stakeholder feedback in fewer revision cycles.

Key Projects

- **Crew Self Service** — self-service web portal giving crew members online access to their personal, employment, and document records.
- **My Financial Plan** — financial planning tool designed to help users track and plan their earnings and savings.
- **Workforce Management** — internal system for managing workforce data, assignments, and related operational records.
- **Merchant Portal (E-commerce Admin)** — admin console for merchants covering product, order, and account management.
- **SAI Chatbot** — conversational assistant interface, including chat UI, message states, and response patterns.
- **MWORLD Mobile App** — all-in-one mobile app unifying news, shopping, job applications, and crew self-service in a single experience; designed end-to-end screens, cross-module navigation, and a shared component library.
- **Appointment Planning Mobile App** — mobile app for booking and managing appointments, covering scheduling, calendar views, and confirmation flows.
- **Interview Scheduling Web App** — web application for scheduling individual and batch interviews, including slot assignment, bulk scheduling, and schedule management for recruiters.

Accur8 Enterprise Solutions Inc. | Metro Manila, Philippines

UI/UX Designer | Front-End Developer | 2018 – 2023

- **Cargill Portal Management (2022–2023)**: Designed dashboard, CAK records, CRUD interfaces, maintenance, file management, file imports, and reporting screens in Figma, then led front-end development in ReactJS with Axios API integration against NodeJS services, Vite for tooling, Postman for API testing, and Jest/React Testing Library for coverage.
- **AESI Website Redesign (2022)**: Designed and prototyped the landing page, solutions, about, careers, and contact pages in Figma, then built them in GatsbyJS with SASS/SCSS for fast-loading, mobile-responsive delivery.
- **Wholemart E-commerce (2022)**: Redesigned and rebuilt the checkout flow in ReactJS, streamlining the purchase journey and improving responsiveness across devices.
- **STAR Website (2021)**: Designed and developed a full marketing site including homepage, company timeline, services, networks, and an interactive Philippine map, using Figma, GatsbyJS, and SASS/SCSS in close collaboration with stakeholders.
- **Books / Accounting (2018–2021)**: Designed back-office modules — dashboard, inventory, sales, manufacturing, general ledger, jobs/projects, reports, data center, and settings — and built them in AngularJS against Laravel backend services.
- **Peeps / HRIS (2018–2021)**: Designed and prototyped dashboard, profile, time management, leave application, settings, and canteen payables (POS) screens, then implemented them with AngularJS, Bootstrap, and Material UI with full API integration.

Sunjin Warehouse | Metro Manila, Philippines

UI/UX Designer | Front-End Developer (Internship) | 2017 – 2018

- Designed CRUD forms and list views to streamline warehouse data management, and built a barcode scanner interface that simplified data input and retrieval.

EDUCATION

Polytechnic University of the Philippines

Bachelor of Science in Information Technology | 2014 – 2018

PROFESSIONAL DEVELOPMENT

- **UX+ Conference** — Annual attendee since 2023
- **DT | UX Summit** — Attendee, 2024
- **CX Next Philippines Summit** — Attendee, 2024
